

We're proud to be regularly featured in the outcome letters of Ofsted and CQC Local Area SEND inspections

Our involvement in the process has always been positive. We work closely with our local authority partners to support them in accurately assessing their current practices and quality position.

On the next slide you will see statements from various local authorities who have adopted our tools, acknowledging the positive impact of Invision360 on the improvement of their quality.

‘Leaders have taken effective action to improve the quality of EHC plans...This has led to a robust quality assurance process, supported by external partners, to ensure rigour.’ (Oct 2022)

‘Leaders have established quality assurance processes for EHC plans and the contributions professionals make to them. They have ensured that new EHC plans are audited against a quality assurance framework and this has resulted in EHC plans of better quality that meet statutory requirements. In newer and recently amended EHC plans, children and young people’s needs are clearly identified.’ (Nov 2022)

‘Internal quality assurance reviews are thorough and identify precisely where improvement is required.’ (July 2023)

‘Leaders have strengthened the quality assurance of the administration of EHC plans. This has enabled leaders to identify where they need to make improvements more quickly. Leaders have increased capacity in the SEND team. This is helping to ensure that newer EHC plans more fully reflect the individual needs of children and young people and the support they should receive.’ (Nov 2023)
